University, Baroda and Retired IAS Officer, Prof. A.M. Khan, Registrar, Deans, Syndicate Members at the 37th Annual Convocation of Mangalore University

CONVOCATION ADDRESS BY SMT. PADMA RAMACHANDRAN

I feel greatly honoured and happy to have been invited to this well-thought-of and well thought out, beautiful University. I had visited it some years ago for conducting a training programme run by a UGC committee to empower and enthuse higher level University teachers, who want to strive for and reach decision-making levels. The idea was that more and more such well-equipped women teachers at higher levels couldinfluence and make many more women teachers interested and competent for higher jobs, and strive for what we all want –women's progress and their greater involvement in helping other women. Since then your University has obtained many laurels, judged by the results, and I hope you keep growing and fulfilling your dreamsof achievement.

Though yours is a young University having been started only in 1980, you have made great strides –whether in terms of developing this beautiful campus or winning an "A" grade from NAAC –I do know its strict rules for assessment. So, now the expectations will be that this high level of performance has to be maintained through everyone's participation.

Your University has no time to rest. Each person has role to play in keeping up the proclaimed standards –whether as student or teacher not only in studies and results, but also in service to the public. And that comes with enabling each one to cultivate empathy for those less privileged in society. I do not have to repeat to you what is meant by strength by character which is a prime requirement especially amongst those who are lucky to get university education. Even Mahatma Gandhi conducted several tests on himself in a variety of areas from vowing not to eat meat, to pursuing non-violence in life. Such of you who wonder what other matters he experimented with, may read up the literature in this area, including his own books. All this will help you to understand why and when 'restraint' is of the highest importance in life, and how it can be cultivated if you want to be a disciplined citizen. Remember, there are many children and even adults, who never have had or never have a chance to get into higher education-nay, they cannot even think of basic education.

The best example I could give you about wanting to pursue higher studies after finishing school but being sure it would never happen is to tell you about my own experience. I never imagined I would ever enter the portals of a university. I was the youngest of six children, with four girls and one boy above me – I assumed that just like my sisters I could not hope to study any more than School Final. This was in the 1950s. My father had felt let down when I, a girl was born instead of a boy he wished for, so much. As I grew older, he wanted me to do all that I would have achieved or accomplished had I been born a boy. So deep was his desire that he made up his mind to send me to a girl's college in Madras with my brother who was joining the Loyola College for Boys. What good luck that he could convince my mother that I would be safe and that I should be given the chance which the other four girls could not get – in fact, the two eldest ones got married very early in life in their very early teens!

I would not be here today but for this lovely twist in my life. So, one of the things to be thankful for is all that your parents and family do for you, no matter what the cost is, in terms of money or whatever else, as well as your teachers and friends. We also receive several bounties in life, from even unknown persons, so why not we also do as many good deeds for others as we can, all our lives. Today is a big day for you – you who have been lucky enough to have received – when you can promise yourself that you will try to do as much good as you can for others, especially incognito, without waiting for reward.

This is also a wonderful moment to be happy at the many opportunities that have come your way and to vow that you will not fritter them away by showing off your skills, achievements and boasting about your success stories. Pride and prejudice can harm you like nothing else can. Lack of empathy is another sword that will cause you much sadness, as can jealousy.

Even about jealousy, I experienced a terrible instance which is totally shocking and simply unbelievable. You will think it is a fib. I promise that it is a true story which should not happen to anyone. We were in High School and our teacher told us that we would have a test the next week in History. She told us to study the portion from a chapter which had 50 or 60 pages of our history book. We were all thrilled that it was from a specific portion which would be easier to handle (and we could even mug it up and get marks easily) than having to read all the chapters.

Reading that chapter was easy, I thought and postponed it to the last minute. But lo and behold! When I opened my book, I was startled to find that entire portion missing – it had been carefully and neatly torn out after being taken from my desk where I must have left it in class at break-time. What was I to do – I could reach no one else for it – it was too late and dark.

Next day I ran to the teacher, thinking I was in for a good scolding of lack of interest, carelessness and sheer lethargy, postponing it to the last minute. Can you imagine how I was saved? She, as a teacher, knew all the students well and had been noticing this particular student who had been showing signs of anger whenever I had scored higher, and so the teacher had deliberately kept a test of this kind. Though sorry for that girl, everyone in the class knew what a precious lesson had been learnt by all,

for life, that day. Each of us took a vow to never show any jealousy to anyone for the cost of it and the sense of stupidity and pettiness is too much to bear.

You are all very young and may sometimes be tempted to go off- track. So, let me tell you the story of the lawyer who was well-known as being thorough with his arguments and being right always. His Assistant had prepared the speech so well that after reading it, one could never go wrong. But the Lawyer ignored the written text saying that he knew the case by-heart and so folded and gave back the paper to his Assistant. In the middle of his master's speech, the assistant realised that his boss was giving the case for the opposite side. He nudged the lawyer said – My Lord, I have narrated to you what the opposite side would be ready with. I now request you to listen to the plea of my client. You all have to be like that clever lawyer.

Did I mention to you how important it is to cultivate, (if you don't have it naturally) a good sense of humour? Many plans can be completely destroyed and many friends lost if matters are taken too seriously- of course you must know when things have to be dealt with sombrely and with respect as at a funeral. It would be a bad comedy of errors if you were morose when you had to be humorous and laughing when you had to be serious. There used to be a saying that Winston Churchill won the World War more because he had a fantastic sense of humour than anything else.

I must tell you what happened once when I was an IAS Probationer. During the Independence Day Parade we were put on duty to escort the VIPs to their seats, a role that was scary (and yet could be boasted about to your friends later). As I was standing on the lawn waiting for the guests, I felt two hands gently holding my shoulders to ask for letting the person go. You can imagine my unhappiness that I had blocked the way and even wondering how anyone dared to touch me (even though it was feather soft). I turned around and saw, shocked, that it was the Honourable Prime Minister of India, Pandit Nehru who I had blocked when he had wanted to move forward to his allotted seat ! How shameful I felt, yet I was in seventh heaven.

I have read the Convocation Addresses of a few well-known persons from across the world and I was surprised at the work they have themselves taken up on becoming famous. For instance, Oprah Winfrey, a well-known TV personality, is one to whom many people go for advice about how to succeed, nay, even to become literate and start working. Similarly a person who was very poor raised her prospects through writing the Harry Potter books. Youngsters devour these books with great interest. Here is a win-win situation for a person who was at the edge of life while providing a wonderful brand of books for the children of the world. And of course, how can we forget Obama's winning slogan: Yes, I Can!

Friends, there are many examples for you to practise looking at the brighter side of things. Our first Governor General, C.Rajagopalachari whose brilliance as well as love for our countryseemsunbeaten, used to say that to appreciate the shade, we must stand, and we must stand under the sun until it hurts. And note the humility of Mahatma Gandhi – it is said that he felt thus: "I must rush to catch up with my followers: they are so far ahead of me."

Friends, I have, in this short while, emphasized the aspect of character and high integrity that will help you succeed in life, as well as help others come up. But, as I myself found, it is very important to seek excellence in whatever work you do. You or I being "good" is just not enough. As someone described why his friend is not a success at the work place, he said "yes, indeed he is very good as a person, but good for nothing". Try to avoid getting any of the following tags - he/she is lazy, or flighty, has a soft corner for the opposite sex, is dreamy or chatty, can you tell me some more? One of the best ways of keeping yourself alert and active about what is happening in the world is to take to something called Lifelong Learning. Nelson is the most powerful weapon which you can use to change the world. He also believed in waiting – and not giving up easily. If you have not read his book "Long Walk to Freedom", you have missed something wonderful.

Amongst those persons who have done first class work but are hardly talked about is Romulus Whitaker. We are even afraid about cockroaches and rats, but here is a person who dealt with probably the most venomous creatures on earth. Amongst many other things of use to society, he founded the Madras Snake Park in 1969 to rehabilitate the Irula Tribals. These tribals had lost their livelihood after trading of snakes was banned under the wildlife Protection Act. Whitaker engaged the tribals in a project to extract snake venom and sold it to pharmaceutical companies making anti-venom drugs. It was said to be very successful.

There are many persons in the world from whom wonderful hints would emerge which we can make use of if we want to be good citizens of this country and have had the opportunity to learn in prestigious institutions such as this one. I hope each one of you will look around or think about, what he or she can do for the country and this beautiful alma mater which they have had the good fortune to study in.

Once again, I express my deep gratitude to my friend the Vice Chancellor and all of you for giving me this lovely opportunity to spend some time with you.

FROM THE VICE CHANCELLOR'S DESK

This issue of Newsletter highlights significant work and contributions made by the University in the field of teaching, research, sports and other activities undertaken during January-June 2019. I have assumed the office of the Vice-Chancellor on 4th of June 2019 prior to which Prof. Ishwara P. and Prof. Kishori Nayak K. were acting Vice-Chancellors.

Over the past 38 years, Mangalore University has grown into a multidisciplinary and research oriented university. The University has been ranked in the second position at the national level in UI Green Metric World University Ranking and in the 178th position at the global level. It is among the 26 State Universities in the country selected for the GIAN programme. Mangalore University is one of the top 50 Universities at the national level on the basis of QS World University Ranking (48th place) and has 6th place at state level as per the K-SURF Ranking of 2019.

The important events that took place during the first half of 2019 include the 37th Annual Convocation, Five GIAN Programmes, a Workshop on Capacity Building by RUSA and two Workshops for the University Campus and for the colleges about applying for NAAC accreditation etc.

Our teaching faculty have rendered themselves creditably in their teaching and research activities. Our students have performed well in academics, sports and cultural activities at the national level. The NSS volunteers of the University are actively participating in Swachh Bharat programme and other social activities like blood donation, creating health awareness among general public etc. The non-teaching staff, research scholars and students have contributed immensely to the overall growth of the University. I would like to congratulate all of them for their consistent support towards achieving excellence in higher education. I appreciate the efforts of the editorial committee in bringing out this issue of the Newsletter.
