

M.Sc. Mathematics Choice Based Credit System (Semester Scheme) Programme

from the academic year 2019-20

Preamble:

The syllabi for the M.Sc. Mathematics Choice Based Credit System (Semester Scheme) Programme in use at present were introduced from the academic year 2016-17. To enable the programmes to be on par with global standards and to provide hands on experience, Lab components have been added. Hence the following revised and restructured syllabi for the M.Sc. Mathematics Programme have been prepared as per the regulations of the University. The Practical Lab introduced are of 2 credits each in first 3 semesters. In the syllabi, all the hard core and soft core courses have been retained from the syllabus of 2016-17. The first paper in each of the second and the third semesters is an "Open Elective" paper, which is offered only to the students of other departments. The syllabi takes into consideration the recommendations of U.G.C. Curriculum Development Committee and it is meant to be introduced from the academic year 2019-20*.

**Revised as per the Special BOS meeting on 25.01.2020 with inclusion of one open elective course and three soft core courses in Third semester and three soft core courses in Fourth semester to take the lead in the competitive/emulating industry/market based on the recent developments/inventions in the society.*

Programme Outcome:

- Provide a strong foundation in different areas of Mathematics, so that the students can compete with their contemporaries and excel in the various careers in Mathematics.
- Develop abstract mathematical thinking.
- Motivate and prepare the students to pursue higher studies and research, thus contributing to the ever increasing academic demands of the country.
- Enrich the students with strong communication and interpersonal skills, broad knowledge and an understanding of multicultural and global perspectives, to work effectively in multidisciplinary teams, both as leaders and team members.
- Facilitate integral development of the personality of the student to deal with ethical and professional issues, and also to develop ability for independent and lifelong learning.

Programme Specific Outcome:

- Students will demonstrate in-depth knowledge of Mathematics, both in theory and application. They develop problem-solving skills and apply them independently to problems in pure and applied mathematics.
- Students will attain the ability to identify, formulate and solve challenging problems in Mathematics. They assimilate complex mathematical ideas and arguments.
- Students will be able to analyse complex problems in Mathematics and propose solutions using research based knowledge
- Students will be able to work individually or as a team member or leader in uniform and multidisciplinary settings.
- Students will develop confidence for self-education and ability for lifelong learning. Adjust themselves completely to the demands of the growing field of Mathematics by lifelong learning.
- Effectively communicate about their field of expertise on their activities, with their peer and society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations.
- Crack lectureship and fellowship exams approved by UGC like CSIR – NET and SET.
