**DSC with Practical Course**

# **programme Structure for bachelor science/Arts (Basic/Hons) programme (Subject with Practicals )**

Name of the degree program :BSc\BA Hons (4 years)

Discipline Core : Philosophy

Total Credits for the program: 180

**Starting year of implementation: 2021-22**

## **Introduction:**

Generally the subject of philosophy is known as mother of all science . In other words, Philosophy is the basics for all social sciences and sciences; because the aim of the both philosophy and sciences is one and the same , that is the well being of the humanity though out the world. Even though we are highly advanced in the field of science and technology we have failed to understand the relation between man and man, man and world (nature) because unfortunately we have not given the importance to philosophy as subject for study and practice . The study of philosophy prepares the next generation of global citizens to rise above and to learn the challenges of society and the help to solve them.

## **Program outcomes:**

Philosophy as a subject has five important branches, namely epistemology, metaphysics, ethics, logic and aesthetics.

In these days of globalization, Philosophy and its branches have their own importance in all the fields of knowledge and these are very essential for the holistic development of the human personality and a peaceful and harmonious society. The study of philosophy intends to develop the individual personality holistically and produce people of character.

**Job options** - The course will be enable the candidate to work as teacher / lecturer, PRO, Assistant, to professional personality development programmer,

clinical psychologist and guide for Indian heritage and culture, leadership trainer.

### **Epistemology:**

This is one of the branches of philosophy which studies about how one should get valid knowledge of the external world, such as the relation between word and world , it means existence, role of language in acquiring knowledge of the world , analytical , synthetic propositions, apriori and aposteriori proposition, source of knowledge, etc. This is the only subject which studies all of these.

### **Metaphysics:**

Normally there is a saying that where physics ends metaphysics starts. It is true also. Because no other subject thinks about the unworldly things such as religious aspects, heaven and hell , concept of liberation and its means , god and his existence . How to get rid of all bondage in this material world? The aim of all the human beings is to know all these concepts one should have the metaphysical perspective also.

### **Ethics:**

It is the study of 'good' and 'bad', 'right' and 'wrong'. in other words , it is the study of human conduct in the society we are unable to understand the relation between man and man, man and world, man and society , that is his role in the society, man and animal, importance of nature, how one should protect the environment, etc. This includes all Indian and Western ethical theories which are very much significant in the present day society. Now there is a lack of awareness of ethical aspects particularly in the youth. Therefore it needs to be taught.

These are the important aspects which are going to be studied in ethics, which is one of the main branches in philosophy. The study of ethics will enable the student to apply basic ethical concepts and approaches to solving practical problems in ethics.

### **Logic:**

It is also one of the main branches of philosophy, it deals with inductive and deductive logic; propositions, critical thinking, finding solutions, to any

problems which are related to logical reasoning in any field of life or knowledge.

### **Aesthetic:**

In Indian culture there is lot of importance given to the all kinds of values and value judgements .By studying Indian schools and western views regarding beauty and other similar concepts we are able to find the similarity and differences, between these concepts. These one of the important subjects which makes man's life very meaning full. It is also one among the branches of philosophy which studies about the beauty, values, art, problems in art, tragedy, humour, ugliness, different theories of art , etc.

Assessment: Weightage for assessments (in percentage)

| Type of Course                           | Formative Assessment / IA | Summative Assessment |
|------------------------------------------|---------------------------|----------------------|
| Theory                                   | 40                        | 60                   |
| Practical                                | 25                        | 25                   |
| Projects                                 | -                         | -                    |
| Experimental learning (Internships etc.) | -                         | -                    |

## **Curriculum Structure for the Undergraduate Degree Program**

### **B.Sc/BA Honors - 4 years (PHILOSOPHY)**

Total Credits for the program: 180

starting year of implementation: 2021-22

Name of the Degree program: B.Sc\BA Honors

Discipline / Subject: Philosophy

Program articulation matrix:

This matrix lists only the core courses. Core courses are essential to earn the degree in that discipline/ subject. They include courses such as theory, laboratory, project, internships etc. Elective courses may listed separately.
